WEEK 4 ASSIGNMENTS
Q1. Learn the four main directions and sub-directions from the given picture.
Q2. Learn and write the name of 7 continents and 5 oceans.
E. Answer the following questions:

Q1. How can we find the directions on the map?

A1. [i]. The top of the map shows the North direction.

[ii]. The bottom of the map shows the South direction.

[iii]. Towards our right side is the East direction.

[iv]. Towards our left side is the West direction.
Q2. Why is a map more useful than a globe?

A2. A globe can be useful when we want to study the Earth as a whole, but if we want to study only a part of the Earth, a map gives more information than a globe.

Q3. Why cannot we see the whole Earth at a time?

A3. Since the Earth is spherical in shape, we can only see half of it facing us.
Q4. What is the difference between a globe and a map?

A4. A globe is a model of the Earth and a map is the drawing of the Earth on a flat surface.
